- Successfully created my own website with bootstrap, JavaScript (link). http://shitanshusarode.me/

EXPERIENCE

INTERNSHIP

Egen Solutions Inc (Font End/UI Developer), Naperville, IL   **August 2016-December 2016**
Movieflix project shows my work with **HTML, JavaScript, XML, XSL, CSS, MS SQL Server** & **Bootstrap** library to quickly build project UI's for code optimization and performance.

- Incorporated JavaScript to build accordion style content, drag and drop functionality, calendar, windows.
- Full version of the product is achieved by using standard coding and incorporating feedback into the design.
- **Angular.js and Node.js** framework is used for developing single page web applications.

PROFESSIONAL EXPERIENCE

Abhyudaya Multimedia (Software Developer), Indore /India   **June 2012-November 2014**
Description: EURO5 is the project which allows all NISSAN EURO5 users to access all the information like Nissan or Infiniti service, repair, training, campaigns, tools, parts, vehicle codes and homologation data.
Responsibilities:

- Involved in Agile full **software development lifecycle (SDLC)**. Designing, coding, testing, debugging and support. Worked as part of team responsible for overall UI development, Usability Testing and Analysis, high-fidelity mockups and responsive component development.
- Designed and Developed front-end UI & modified UI screen using **HTML5, CSS3, JavaScript, JQuery**, **Bootstrap, AJAX**, **JSP.** Built web-app with **JavaScript** framework as well as using Restful Web services for backend server calls. Used **git** for version control system. **Incorporated C++** for listing items for display & other functions.
- Extensively used **Core Spring Framework** for **Dependency Injection** of components & Web **Services** using **Spring Restful**. Developed **Hibernate** with **Spring Integration** as the data abstraction to interact with DB.
- Customized complex **JIRA workflows** including project workflows, screen schemes, permission scheme and notification schemes in JIRA, performed unit testing using pure JavaScript and **Junit** for Java Web services APIs.
